Polyester bags are foldable and once they are put away in their pouches, they are really tiny. Thus, once personalized they can be taken and distributed everywhere.
Isothermal bags are really useful because they combine a carrier compartment and an isothermal pocket, no need to carry several bags anymore! Isothermal boxes and cool bags are useful for longer transports of fresh products. For these products, you can choose the construction and the material.
These mesh bags are perfect for fruits and vegetables grocery. They are airy, strong, reusable and washable. You can also use them for your laundry to avoid damaging your linen.
The cotton bag, also known as tote bag is a good alternative to plastic bags. It is washable, reusable and really strong. When you customize it, it helps to have a better communication and become a fashion accessory.
Paper bags become more and more famous: they are ecological and send a positive message. Useful, they allow you to pack your products safely. Luxury or kraft, we make the bag which corresponds to you, with your brand logo.

We produce ecofriendly straws, bowls, plates, cutlery and paper cups. These objects are made from biodegradable raw material such as carton, glucose, rice putty. Besides, we offer reusable and washable bamboo straws.
Goodies are really helpful to increase your visibility during public events. You can customize these objects with your logo and then give these to the public.
SYSTEMATIC QUALITY CONTROL IN OUR FACTORIES

Our quality managers go on a regular basis to our factories to control every step of the mass production.
