Direct Imex is specialized in manufacturing and distributing reusable and customizable packaging.

Based in Vietnam since 2015, our experienced and adaptable teams offer the best service to customers according to their individual needs and concerns.

Quality, efficiency, understanding customer needs, customization and environment-friendly innovation are at the heart of Direct Imex's strategy.

We are able to provide the best solutions for your purchase and product/warehouse sourcing needs as well as keep you away from having any quality or transport-related issues thanks to our physical presence in Asia.

We are able to provide the best solutions for your purchase and product/warehouse sourcing needs as well as keep you away from having any quality or transport-related issues thanks to our physical presence in Asia.

With our expertise in recent law regulations on raw materials, we aim to become a strong and knowledgeable partner for your business.

WHAT MAKES DIRECT IMEX A VALUABLE PARTNER

DirectIMEX

PRODUCTION

We work closely with our partner factories in Europe and Asia. Our teams work in both continents to develop and produce only the best quality products.

DESIGN

Our design team is at your service for any individual request. We are flexible and can easily adapt to your specific needs. Feel free to contact our agents for any request.

LOGISTICS & STORAGE

By having partners in Asia and Europe, we managed to create synergy and optimize transportation time for our customers. We give you the possibility to store your purchases with us and set up your required frequency of delivery. So you have the opportunity to buy at bulk prices without storage space issues.

Can't find the packaging
you are looking for?

From printing to designing specific shapes and sizes,
Direct Imex's team will design the perfect packaging for you.
Don't hesitate to send us your inquiries.

non contactual picture

KRAFT PAPER

Sack kraft paper (or just sack paper) is a porous kraft paper with high elasticity and high tear resistance, designed for packaging products with high demands for strength and durability.

BAGASSE

Bagasse (ba-gas) is plant fibre. More specifically, it is the fibrous matter by-product left over from the production of sugarcane.

GREASEPROOF PAPER

Greaseproof paper or butcher's paper is kraft paper. Originally sold to butcheries for the purpose of wrapping meat and fish, butchers' paper is now used for a wide variety of purposes. You can use it as a support in your pizza or cold-cuts delivery boxes.

RPET

RPET stands for recycled polyethylene terephthalate or recycled PET. PET is a strong, durable and recyclable material that is used for bottle and cup lids.

PLA

PLA has become a popular material due to it being economically produced from renewable resources. PLA is made from fermented plant starch such as from corn, cassava, sugarcane or sugar beet pulp.

CARDBOARD

A cardboard carton is made of thick paper stock or heavy paper-pulp.

For example, a cereal box is made from cardboard.

CORRUGATED CARTONS

Corrugated cartons are made up of a few layers of material rather than just a single sheet.

Its high-tech construction ensures the material can carry a wide range of weights, protects against moisture and provides sustainable packaging solutions.

BEE'S WAX PAPER

Beeswax wrap is made by infusing cotton with resin, food-grade beeswax and an oil, commonly coconut or jojoba. The wax coating allows the cloth to be breathable and waterproof.
